- Strong network proficiency in troubleshooting and designing networks through the Cisco IOS command set.
- Familiarity with cloud environments(azure, google cloud, aws)
- Strong Problem solving
- hardware knowledge, use of data structure and software design

## PROJECTS

### **Mainline Train System— details**

Developed a real-time train tracking system as part of a two-member team, providing users with an interactive web interface for live train and route tracking. The system is powered by an advanced database with continuous MQTT integration, ensuring accurate, up-to-date train information. The project also enabled user interaction with the support team via the website. This complex project presented numerous connectivity challenges, which we successfully navigated by leveraging teamwork and problem-solving skills to deliver a stable, user-friendly application.

## EDUCATION

2022-ongoing BSc in Cloud Computing with Technological University of Dublin, Tallaght

2020-2022 International Baccalaureate at English International School Of Padua

2018-2022 IGCSE at English International School Of Padua

## AWARDS

NVIDIA DLI certificate - In Fundamentals of Deep Learning

## LANGUAGES

Italian Native  
English Native
